JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Aprotic medias
Electroreduction of oxygen in aprotic media (Vasudevan, Wendt) 69

Buckminsterfulleride anions
Effects of calixarenes on the electrochemical reduction of buckminsterfullerene, C_{60} (Chen et al.) 101

Calixarenes
Effects of calixarenes on the electrochemical reduction of buckminsterfullerene, C_{60} (Chen et al.) 101
Chronoamperometric current
A two-point Padé approximation for the non-steady-state chronoamperometric current at ultramicrodisc electrodes (Rajendran, Sangaranarayanan) 75
Complexation with 15C5
Effect of the solvent composition and of the addition of 15-Crown-5 on the conductance of lithium picrate and lithium perchlorate in acetonitrile + nitromethane mixtures (D'Aprano et al.) 27
Conductance
Effect of the solvent composition and of the addition of 15-Crown-5 on the conductance of lithium picrate and lithium perchlorate in acetonitrile + nitromethane mixtures (D'Aprano et al.) 27
Copper phenanthroline derivative
Poisoning effect of SCN^-, H_2S and HCN on the reduction of O_2 and H_2O_2 catalyzed by a 1 : 1 surface complex of Cu: 1,10-phenanthroline adsorbed on graphite electrodes, and its possible application in chemical analysis (Marques et al.) 43
Cyanide
Poisoning effect of SCN^-, H_2S and HCN on the reduction of O_2 and H_2O_2 catalyzed by a 1 : 1 surface complex of Cu: 1,10-phenanthroline adsorbed on graphite electrodes, and its possible application in chemical analysis (Marques et al.) 43

Electrocatalysis
Poisoning effect of SCN^-, H_2S and HCN on the reduction of O_2 and H_2O_2 catalyzed by a 1 : 1 surface complex of Cu: 1,10-phenanthroline adsorbed on graphite electrodes, and its possible application in chemical analysis (Marques et al.) 43
Electrochemistry
Effects of calixarenes on the electrochemical reduction of buckminsterfullerene, C_{60} (Chen et al.) 101
Electrodeposition
Molybdenum oxychlorides I. Electrochemistry of MoO_2Cl_2: oxidation, dimerization, and electrodeposition at a platinum electrode (Nyasulu, Mayer) 35
Electrodissolution
Oxidized and reduced poly(2,5-di-(-2-thienyl)-pyrrole): solubilities, electrodissolution and molar mass (Brillas et al.) 55
Electroluminescence
On the mechanism of the voltage tuning of photoluminescence and electroluminescence in porous silicon (Meulenkamp et al.) 97
Electroreduction
Electroreduction of oxygen in aprotic media (Vasudevan, Wendt) 69
Exact solution
The exact impedance of the de Levie grooved electrode (Gunning) 1

Galvanostatic oxidation
Probe beam deflection studies of electrochemical oscillations during galvanostatic oxidation of formic acid at a platinum electrode (Kertész et al.) 91

pH influence
On the nature of the potentiometric response of polypyrrole in acidic solutions (Michalska et al.) 63

Impedance
The exact impedance of the de Levie grooved electrode (Gunning) 1
Ionic sensitivity
On the nature of the potentiometric response of polypyrrole in acidic solutions (Michalska et al.) 63

Lead oxide
In situ X-ray diffraction study of the electrochemical reduction of tetragonal lead oxide and orthorhombic Pb(OH)Cl mechanically immobilized on a graphite electrode (Meyer et al.) 79
de Levie grooved electrode
The exact impedance of the de Levie grooved electrode (Gunning) 1
Lithium perchlorate
Effect of the solvent composition and of the addition of 15-Crown-5 on the conductance of lithium picrate and lithium perchlorate in acetonitrile + nitromethane mixtures (D'Aprano et al.) 27
Lithium picrate
Effect of the solvent composition and of the addition of 15-Crown-5 on the conductance of lithium picrate and lithium perchlorate in acetonitrile + nitromethane mixtures (D'Aprano et al.) 27
Lumped heat capacity
Improved methods to determine the electrochemical Peltier heat using a thermistor. I: Improved heat-sensor electrodes and lumped-heat-capacity analysis (Huixiang et al.) 13

Mathematical model
The exact impedance of the de Levie grooved electrode (Gunning) 1
Modified graphite electrode
Poisoning effect of SCN^-, H_2S and HCN on the reduction of O_2 and H_2O_2 catalyzed by a 1 : 1 surface complex of Cu: 1,10-phenanthroline adsorbed on graphite electrodes, and its possible application in chemical analysis (Marques et al.) 43
Molybdenum oxychlorides
Molybdenum oxychlorides I. Electrochemistry of MoO_2Cl_2: oxidation, dimerization, and electrodeposition at a platinum electrode (Nyasulu, Mayer) 35

Nitric oxide
Selective and sensitive electrochemical measurement of nitric oxide in aqueous solution: discussion and new results (Lantoine et al.) 85

Oscillations
Probe beam deflection studies of electrochemical oscillations during galvanostatic oxidation of formic acid at a platinum electrode (Kertész et al.) 91

Oxidation
Molybdenum oxychlorides I. Electrochemistry of MoO_2Cl_2: oxidation, dimerization, and electrodeposition at a platinum electrode (Nyasulu, Mayer) 35
Oxygen reduction
Poisoning effect of SCN^-, H_2S and HCN on the reduction of O_2 and H_2O_2 catalyzed by a 1 : 1 surface complex of Cu: 1,10-phenanthroline adsorbed on graphite electrodes, and its possible application in chemical analysis (Marques et al.) 43

Pb(OH)Cl
In situ X-ray diffraction study of the electrochemical reduction of tetragonal lead oxide and orthorhombic Pb(OH)Cl mechanically immobilized on a graphite electrode (Meyer et al.) 79
Peltier heat
Improved methods to determine the electrochemical Peltier heat using a thermistor. I: Improved heat-sensor electrodes and lumped-heat-capacity analysis (Huixiang et al.) 13
Improved methods to determine the electrochemical Peltier heat using a thermistor II: Extremum and optimization methods (Huixiang et al.) 21
Photoluminescence
On the mechanism of the voltage tuning of photoluminescence and electroluminescence in porous silicon (Meulenkamp et al.) 97
Platinum electrodes
Probe beam deflection studies of electrochemical oscillations during galvanostatic oxidation of formic acid at a platinum electrode (Kertész et al.) 91
Poison
Poisoning effect of SCN^-, H_2S and HCN on the reduction of O_2 and H_2O_2 catalyzed by a 1 : 1 surface complex of Cu: 1,10-phenanthroline adsorbed on graphite electrodes, and its possible application in chemical analysis (Marques et al.) 43

Poly(2,5-di-(-2-thienyl)-pyrrole)
Oxidized and reduced poly(2,5-di-(-2-thienyl)-pyrrole): solubilities, electrodissolution and molar mass (Brillas et al.) 55
Polypyrrole
On the nature of the potentiometric response of polypyrrole in acidic solutions (Michalska et al.) 63
Potentiometric response
On the nature of the potentiometric response of polypyrrole in acidic solutions (Michalska et al.) 63

Redox sensitivity
On the nature of the potentiometric response of polypyrrole in acidic solutions (Michalska et al.) 63

Solubility
Oxidized and reduced poly(2,5-di-(-2-thienyl)-pyrrole): solubilities, electrodissolution and molar mass (Brillas et al.) 55

Thermistor
Improved methods to determine the electrochemical Peltier heat using a thermistor. I: Improved heat-sensor electrodes and lumped-heat-capacity analysis (Huixiang et al.) 13
Improved methods to determine the electrochemical Peltier heat using a thermistor II: Extremum and optimization methods (Huixiang et al.) 21

Ultramicrodisc electrodes
A two-point Padé approximation for the non-steady-state chronoamperometric current at ultramicrodisc electrodes (Rajendran, Sangaranarayanan) 75

X-ray diffraction
In situ X-ray diffraction study of the electrochemical reduction of tetragonal lead oxide and orthorhombic Pb(OH)Cl mechanically immobilized on a graphite electrode (Meyer et al.) 79
